

ColCom 2026

IEEE Colombian Conference on Communications and Computing

(<https://2026.ieee-colcom.org>)

SUBMISSION FORMAT

Papers should be written in English or Spanish, but at least the abstract MUST be written in English. Papers must be unpublished, and not submitted elsewhere. Full papers must be formatted as the standard IEEE double-column conference template and submitted exclusively using the link [Submission](https://cmt3.research.microsoft.com/COLCOM2026) (<https://cmt3.research.microsoft.com/COLCOM2026>). There you must register, create an account, register your abstract and submit your paper.

A maximum 6 pages are allowed for each paper, including all illustrations and references.

Note: You must select the track where your paper is being submitted to. Papers must not be submitted to more than one track.

IMPORTANT DATES

Conference dates: September 2 – 4, 2026

Submission deadline: June 13, 2026

ACKNOWLEDGEMENT

The Microsoft CMT service was used for managing the peer-reviewing process for this conference. This service was provided for free by Microsoft and they bore all expenses, including costs for Azure cloud services as well as for software development and support.

CALL FOR PAPERS

ColCom

2026

IEEE COLOMBIAN CONFERENCE ON COMMUNICATIONS AND COMPUTING

PAPER SUBMISSION DEADLINE
June 13, 2026

September 2 – 4, 2026
Bucaramanga, Colombia

CONFERENCE TECHNICAL TRACKS

Wireless Communications and Networking

- 5G/6G and beyond, cellular systems
- MMO, multi-user MIMO, massive MIMO
- Advanced modulation, coding, antenna systems, space-time processing
- Cross-layer design, resource allocation, interference management
- Wireless body-area networks, femtocells, traffic offloading
- Congestion/flow control, spectrum management

Smart Environments

- IoT/IoT architectures, LPWAN, edge/cloud integration
- Future Internet experimentation for IoT
- MDM and cellular IoT protocols
- SDN/NFV for IoT
- Personal Area Networks, sensing/actuation technologies
- Smart homes, healthcare, education, agriculture, environment
- Smart cities for special needs
- QoS/QoE in smart-city services
- Industry 4.0, wireless industrial networks

Cybersecurity

- Security and safety systems
- Privacy, anonymity, authorization, access control
- Cryptography and secure communications
- Vulnerability analysis, intrusion detection/prevention
- Cloud and distributed application security
- Mobile and wireless network security
- OS/app security, secure boot, firmware trust, forensics
- VPNs, group security, trust models
- Malware, exploit analysis, threat intelligence

Applied Electromagnetics for Wireless and Communication Systems

- Antenna design and integration for wireless, IoT, and 5G/6G communication systems
- Propagation, channel modeling, and measurements in indoor, urban, and complex environments
- Electromagnetic compatibility, interference, and coexistence in wireless and communication systems
- Measurement techniques, test setups, and electromagnetic environment characterization
- Computational electromagnetics and AI/ML methods applied to antennas, propagation, and EMC
- Electromagnetic resilience and security of communication systems, including aerospace, transportation, and critical platforms

AI, Generative AI, Big Data & Machine Learning for Networking

- AI/ML for 5G/6G/6G, slicing, RAN optimization
- AI/ML for SDN/NFV, programmable data planes
- Neural networks, deep learning for resource management
- LLMs for smart cities, traffic analytics, fault diagnosis
- Big data architectures for cloud, IoT, CPS, smart grids
- Data-driven networking and automation
- Federated learning for virtualized and distributed networks
- Predictive and real-time analytics
- ML over-the-air training
- Operational intelligence
